

Contents

Preface	vii
List of contributors	ix
UXDs-Driven Contradiction Solving For Conceptual Design Using CAIs <i>Tan Runhua</i>	 1
Computational Explorations of Compatibility and Innovation <i>Ricardo Sosa, John S. Gero</i>	13
Emergent contradictions: A synthesis of TRIZ and complex systems theory <i>Darrell Mann</i>	23
Creative Tower Generated by Computational Intelligence <i>Xiyu Liu, Hong Liu</i>	33
General Theory of Innovation An Overview <i>Greg Yezersky</i>	45
Locating Creativity in a Framework of Designing for Innovation <i>John S. Gero, Udo Kannengiesser</i>	57
Research and Implementation of Product Functional Design Based on Effect <i>Cao Guozhong, Tan Runhua, Lian Benning</i>	67
OTSM Network of Problems for representing and analyzing problem situations with computer support <i>Nikolai Khomenko, Roland De Guio</i>	77
A Text-Mining-based Patent Analysis in Product Innovative Process <i>Liang Yanhong, Tan Runhua</i>	89
Technology Innovation of Product Using CAI System Based on TRIZ <i>Zhang Jianhui, Yang Bojun, Tian Yumei, Tan Runhua</i>	97
Axiom-based Potential Functional Failure Analysis for Risk-free Design <i>Zhang Peng, Tan Runhua</i>	107
Using the CAI software (InventionTool 3.0) to solve complexity problem <i>Zhang Peng, Tan Runhua</i>	115
Generative Art Images by Complex Functions Based Genetic Algorithm <i>Hong Liu, Xiyu Liu</i>	125
Supporting the Sytematization of Early-Stage-Innovation by Means of Collaborative Working Environments <i>Alexander Hesmer, Karl. A. Hribernik, Jannicke Baalsrud Hauge, Klaus Dieter Thoben</i>	135

Constraint based modelling as a mean to link dialectical thinking and corporate data. Application to the Design of Experiments. <i>Thomas Eltzer, Roland DeGuio</i>	145
Development of Standard Solutions CAI System with UML and XML <i>Bojun Yang, Jianhui Zhang, Runhua Tan, Yumei Tian, Jianhong Ma</i>	157
Computer-Aided Patent Analysis: finding invention peculiarities <i>Gaetano Cascini, Davide Russo, Manuel Zini</i>	167
Automatic shape variations for optimization and innovation, Shape Optimization of Cylinderhead Gasket using CFD <i>Noel Leon, Jose Cueva, Cesar Villarreal, Sergio Hutron, German Campero</i>	179
Enhancing interoperability in the design process, the PROSIT approach <i>Umberto Cugini, Gaetano Cascini, Marco Ugolotti</i>	189
Comparison of Strategies for the Optimization/Innovation of Crankshaft Balance <i>Albert Albers, Noel Leon, Humberto Aguayo Thomas Maier</i>	201
Collaboration in automotive winter testing <i>Mikael Nybacka, Tobias Larsson, Åsa Ericson</i>	211
Future of CAE and Implication on Engineering Education <i>Seung-Hyun Yoo, Eung-Jun Park, Jae-Sil Lee, Joon-Ho Song, Dae-Jin Oh, Woong-Rak Chung, Yeongtae Lee, Dhaneshwar Mishra</i>	221
Structuring knowledge use in Inventive Design <i>Denis Cavallucci, François Rousselot</i>	231
Measuring Innovation in Multi-Component Engineering Systems <i>Kenneth A. Shelton, Tomasz Arciszewski</i>	243
